INDEX FOR VOLUME 128

PAGE

Adams, C. C. & Reid, A. W. Systoles of hyberbolic 3-manifolds 103

Aldous, D. J. The percolation process on a tree where infinite clusters are frozen . . 465

Andersson, M. E. An inverse problem connected to double orthogonality in Bergman spaces 535

Atanasi, L. Radon transforms on $\widetilde{A}_n$-buildings 425

Baribeau, L. & Ransford, T. On the set of discrete two-generator groups 245

Baues, H.-J. & Drozd, Y. Representation theory of homotopy types with at most two non-trivial homotopy groups localized at a prime 283

Baumeister, B., Ivanov, A. A. & Pasechnik, D. V. A characterization of the Petersen-type geometry of the McLaughlin group. 21

Bray, J. N. & Curtis, R. T. A systematic approach to symmetric presentations II: Generators of order 3 1

Chang, M.-C. & Kim, H. The Euler number of certain primitive Calabi–Yau threefolds . 79

Chen, B.-Y. Ideal Lagrangian immersions in complex space forms 511

Colliot-Thélène, J.-L. & Skorobogatov, A. N. Descent on fibrations over $\mathbf{P}^1_k$ revisited . 383

Costakis, G. Some remarks on universal functions and Taylor series 157

Cox, A. & Erdmann, K. On Ext^2 between Weyl modules for quantum GL_n . . . 441

Cuong, N. T. & Minh, N. D. Lengths of generalized fractions of modules having small polynomial type 269

Curtis, R. T. & Bray, J. N. A systematic approach to symmetric presentations II: Generators of order 3 1

Darcy, I. K. & Sumners, D. W. Rational tangle distances on knots and links . . . 497

Drozd, Y. & Baues, H.-J. Representation theory of homotopy types with at most two non-trivial homotopy groups localized at a prime 283

Echterhoff, S. & Raeburn, I. Induced C^*-algebras, coactions and equivariance in the symmetric imprimitivity theorem 327

Enochs, E. E., García Rozas, J. R., Oyonarte, L. & Jenda, O. M. G. Compact coGalois groups 233

Erdmann, K. & Cox, A. On Ext^2 between Weyl modules for quantum GL_n . . . 441

Falconer, K. J. Representation of families of sets by measures, dimension spectra and Diophantine approximation 111

Gadea, P. M., Montesinos Amilibia, A. & Muñoz Masqué, J. Characterizing the complex hyperbolic space by Kähler homogeneous structures 87

Gaffney, T. $\mathscr{L}^0$-equivalence of maps 479

García Rozas, J. R., Oyonarte, L., Jenda, O. M. G. & Enochs, E. E. Compact coGalois groups 233

Gordon, C. McA. Corrigendum: Toroidal Dehn surgeries on knots in lens spaces . . 381

Hsu, T. Moufang loops of class 2 and cubic forms. 197

Hsu, T. Explicit constructions of code loops as centrally twisted products 223

Ivanov, A. A., Pasechnik, D. V. & Baumeister, B. A characterization of the Petersen-type geometry of the McLaughlin group. 21

Jenda, O. M. G., Enochs, E. E., García Rozas, J. R. & Oyonarte, L. Compact coGalois groups 233

Kaniuth, E. Ideals with bounded approximate units in L^1-algebras of locally compact groups 65

Keleti, T. & Preiss, D. The balls do not generate all Borel sets using complements and countable disjoint unions 539

Kim, H. & Chang, M.-C. The Euler number of certain primitive Calabi–Yau threefolds . 79

Letsche, C. F. An obstruction to slicing knots using the eta invariant 301

Matsuzaki, K. The Hausdorff dimension of the limit sets of infinitely generated Kleinian groups 123

Megyesi, G. The rationality of configuration spaces of lines in $\mathbb{P}^3$ 193

Minh, N. D. & Cuong, N. T. Lengths of generalized fractions of modules having small polynomial type 269

Montesinos Amilibia, A., Muñoz Masqué, J. & Gadea, P. M. Characterizing the complex hyperbolic space by Kähler homogeneous structures 87

Muñoz Masqué, J., Gadea, P. M. & Montesinos Amilibia, A. Characterizing the complex hyperbolic space by Kähler homogeneous structures 87

Mustapha, S. Gaussian estimates for heat kernels on Lie groups 45

O'Connell, N. A large deviations heuristic made precise 561

O'Sullivan, N. The genus and localization of finitely generated (torsion-free abelian)-by-finite groups 257

Oyonarte, L., Jenda, O. M. G., Enochs, E. E. & García Rozas, J. R. Compact coGalois groups 233

Pasechnik, D. V., Baumeister, B. & Ivanov, A. A. A characterization of the Petersen-type geometry of the McLaughlin group. 21

Pedersen, T. V. Some properties of the Pisier algebra 343

Preiss, D. & Keleti, T. The balls do not generate all Borel sets using complements and countable disjoint unions 539

Raeburn, I. & Echterhoff, S. Induced C^*-algebras, coactions and equivariance in the symmetric imprimitivity theorem 327

Ransford, T. & Baribeau, L. On the set of discrete two-generator groups 245

Reid, A. W. & Adams, C. C. Systoles of hyberbolic 3-manifolds 103

Rein, G. & Rendall, A. D. Compact support of spherically symmetric equilibria in non-relativistic and relativistic galactic dynamics 363

Rendall, A. D. & Rein, G. Compact support of spherically symmetric equilibria in non-relativistic and relativistic galactic dynamics 363

Sheu, Y.-C. A Hausdorff measure classification of polar lateral boundary sets for superdiffusions 549

Skorobogatov, A. N. & Colliot-Thélène, J.-L. Descent on fibrations over P^1_k revisited . 383

Stratmann, B. O. & Urbański, M. The geometry of conformal measures for parabolic rational maps 141

Sumners, DeW. & Darcy, I. K. Rational tangle distances on knots and links . . . 497

Tan, K. M. On the principal blocks of $F\mathfrak{G}_{11}$ and $F\mathfrak{G}_{12}$ over a field of characteristic 3 . . 395

Urbański, M. & Stratmann, B. O. The geometry of conformal measures for parabolic rational maps 141

Wang, S., Wu, Y.-Q. & Zhou, Q. Pseudo-Anosov maps and simple closed curves on surfaces 321

Wright, G. A foliated disk whose boundary is Morton's irreducible 4-braid 95

Wu, Y.-Q., Zhou, Q. & Wang, S. Pseudo-Anosov maps and simple closed curves on surfaces 321

Zhang, B. Commutator estimates, Besov spaces and scattering problems for the acoustic wave propagation in perturbed stratified fluids 177

Zheng, J.-H. Unbounded domains of normality of entire functions of small growth . . 355

Zhou, Q., Wang, S. & Wu, Y.-Q. Pseudo-Anosov maps and simple closed curves on surfaces 321
